

# Instrument Cleaning Instructions

Cleaning your instrument should be done 2 to 4 times a year. Students who do not clean school owned instruments prior to checking them in will be charged to have them cleaned at the music store. The cost for this is usually around \$75. Please watch the video and read all of the instructions before cleaning your instrument. Damage to school instruments will be the students' responsibility to pay for repairs.

## Flute

Rinse head joint in warm soapy water. Clean the inside and outside with your cleaning rod and rag. Clean inside lip plate and hole with Q-tip. Allow head joint to dry completely before putting it back in your case. DO NOT soak the rest of your instrument.

Clean between all keys and rods with your small brush. Wipe all fingerprints off of your flute with a clean, soft rag. Clean the inside of your flute with your cleaning rod and a slightly damp cloth. Dry out the inside of your flute with your cleaning rod and a dry cloth.

Vacuum the dust out of your instrument case before you put away your clean instrument.

## Clarinet/Saxophones

Soak mouthpiece in warm, soapy water. Clean the inside of the mouthpiece with your mouthpiece brush. Allow mouthpiece to dry completely. DO NOT soak the rest of your instrument.

Clean all cork grease residue off of your corks and inside of joints. Use a Q-tip to clean out tone holes (clarinets only).

Swab out your instrument thoroughly. You can use a slightly damp swab if there is any residue inside the instrument.

Follow the damp swabbing with a dry swab. Use your small brush to clean between the keys and rods.

Vacuum any dust out of your instrument case before you put away your clean instrument.

## Trumpets/French Horns/Baritone/Tuba

Soak your mouthpiece in warm, soapy water. Clean it out with your mouthpiece brush.

Take your valves out and lay them IN ORDER on a soft cloth. Take off all of your slides. Soak the instrument and slides in warm soapy water. Use your cleaning snake to clean out the instrument and all of the slides. Take off all of the valve caps and clean them with the brush on your snake and /or use Q-tips.

Swish the bottom half of your valves in soapy water. DO NOT wet the felt pads on the top of the valves. Clean all of the holes in the valves. Lay the valves back down IN ORDER.

Let all of the parts dry completely before putting your instrument back together.

Vacuum out your case before you put your clean instrument back into it.
